Experience

Freelance, Designer & Developer

July 2017 to present

Working on Insights an app that analyzes Amazon product results. It's built on Vue, Node, Psql and hosted on Heroku. I was the designer and lead developer on the project.

Thinkful, UX Mentor

November 2016 to present

I teach the Front End Development and UX Design courses. I'm also on the Review Team, where I determine if a student is ready to graduate based on their projects and portfolio.

EmployStream, Software Developer

November 2015 to July 2017

Built on Angular, Node & Php, EmployStream is a SaaS that automates hiring. I wrote the following features Apply w/ LinkedIn, Change Password, Related Jobs Email Campaign, Custom Dashboard.

Web Machine, Developer and Co-Founder

August 2012 to November 2017

Developed websites using Node, SCSS, Php and JS.

Fathom, Web Developer

November 2014 to September 2015

Developed high traffic websites for CVS, Indiana University and Key Bank. Wrote Pass.js - a library that identifies traffic referral source. (http://garybunofsky.github.io/pass.js/)

Side Projects

Insights, garybunofsky.com/portfolio/insights

Designed & developed a Vue/Node app that analyzes Amazon products.

Blouse, blouse.garybunofsky.com

Blouse is a collection of simple, subtle icons. Install with npm install blouse.

Tiny Notes, tinynot.es

Tiny Notes is a note taking app that allows you to share in .json format.
